FEBRUARY 2023

APPENDIX B: NOAA WEATHER RADIO STATIONS AND COVERAGE

Under the EAS, NOAA Weather Radio stations are encoding all of their alerts using the same coding as used for EAS Alerts. [NOAA named their coding "SAME"- Specific Area Message Encoding.] Broadcasters and cable operators can feed their EAS Decoders with the audio from any normal NOAA Weather Radio receiver, and their EAS Decoder will react to those codes just as it does with broadcaster EAS codes. With the adoption of this Plan, all counties in Wisconsin now have their weather watches and warnings broadcast with the EAS/SAME-Code on at least one NOAA Weather Radio Station. For most up-to-date list from NWS, go to: www.weather.gov/mkx/nwr-table

Page 2 – Wisconsin NWR Map & List

- NWR Station transmitter list
- NWS Office which controls each transmitter (see table below for contact information for each office)
- NWR Station ID's and Frequencies

Pages 3 & 4 - Table of the NWR stations, showing which Wisconsin counties each NWR station carries alerts for, and which counties it also carries the Required Monthly Test (RMT) for.

Note that as of the 2004 update of this Plan, most NWS Offices now simulcast the RMT for all counties in their EAS Area on all of their NWR stations that provide coverage for those EAS counties.

This gives broadcasters and cable operators more options as to which NWR station they can monitor to get both the RMT and weather alerts.

This may allow the monitoring of an NWR station which has a better signal at a given receive location.

If you are experiencing NWR reception problems, check the table on Pages 3 & 4 to see if you can change to a different NWR station.

NWR stations shown with an "R", carry RMT's as well as weather alerts for that county.

NWR stations shown with an "A", carry only weather alerts for that county.

| See list on next page to | determine which transmitter | s each office is responsible for. | |
