

# More About Metadata, What a Facility Needs to Do

Presented to:

David H. Layer Vice President, Advanced Engineering

National Association of Broadcasters
Washington, DC
October 10, 2023

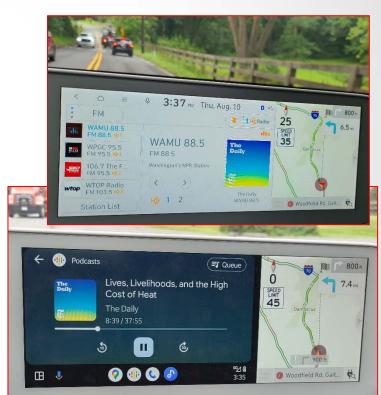

#### What's the big deal?

- Metadata is the "face" of radio
  - -CONSUMERS EXPECT IT
  - -MANUFACTURERS SUPPORT IT

It's a potential source of revenue

Everyone else is doing it

#### What's the big deal?

NAB first published Digital Dash Best Practices in 2017

#### DTS AutoStage™ Video Service, Powered by TiVo™

DTS AutoStage is the only global entertainment platform for the connected car that delivers personalized radio, podcast, music, TV, and movies to the car in a unified user-centric experience. DTS AutoStage Video Service Powered by TiVo brings decades of video content ecosystem relationships and development to the connected car via an award-winning discovery experience and is set up to work with all global and regional content providers.

### 2024 BMW i5 with TiVo video media platform

## 2024 BMW i5 with TiVo video media platform

Can the Ancient Indian Sport of Kabaddi Someday Rival...

The Pro-League With Players

19.0° 🕘 -

#### What about Madison?

- Conducted market survey yesterday
  - Using method from NAB webpage
- Vehicle: 2023 BMW i5

https://www.nab.org/innovation/digitalDashboardAudit.asp

### **Today's presentation**

- About NAB lite
- Implementing metadata
- - -AM radio
  - -PILOT radio test bed
  - -FM digital power increase
  - -Spectrum and regulatory issues
  - -NRSC update

- For ALL stations!
  - AM to support FM translator and HD Radio re-broadcasts (and streaming)
  - -FM should support RDS and HD Radio (if applicable)
- For ALL formats!
  - -Music song title, artist, album art, artist images
  - -News/talk identify show, host, guest, news story
  - -Also, metadata-based advertising

- Case study: PILOT radio test bed
  - -3 AM and 3 FM transmitters
  - -Facilitates interference testing
- Added metadata capability in 2022
  - –New playout system (Zetta)
  - –Metadata middleware (RAPID)

	DIGITAL DASHBOARD Best Practices Report
NATIONAL ASSOCIATION OF SHOADCASTERS	Best Practices Report

### Implementing metadata

### Data Flow in RDS/HD Radio Systems with Middleware and Cleanup/Image Acquisition Services

Note 1 – Some HD Radio systems are configured with the Importer and Exporter at the studio, the recommended practice is to minimally co-locate the Exporter and exciter at the transmitter Note 2 – Some stations locate the RDS encoder at the studio and others at the transmitter

## Implementing metadata

- Hybrid radio services are also important
  - -Combination of internet and over-the-air reception
- Currently hybrid radio services in the US are supported by
  - -DTS AutoStage
  - -RadioDNS

Participation in these services is cost-free

## Implementing metadata

- Consequences of bad or no metadata:
  - -Dissatisfied listeners
  - –Sad-looking station lists
  - -Tarnishes radio brand
  - Lost revenue
  - Automakers take matters into their own hands (ex. on-board Gracenote database)
- Remember, metadata is for ALL stations and ALL formats!

# **Today's presentation**

- About NAB lite
- Implementing metadata
- NAB Technology update:
  - -AM radio
  - -PILOT radio test bed
  - -FM digital power increase
  - -Spectrum and regulatory issues
  - -NRSC update

### **AM** radio

Topic of panel tomorrow morning

- Went to 2022 LA Auto Show to look at AM in EVs
  - Looked at Internal Combustion
     Engine (ICE) vehicles, too

#### 8:45 a.m. - The Future of AM Radio - Panel Discussion

This panel discussion will focus on the recent developments regarding the future of AM radio in automobile dashboards.

Paul McLane, Radio World, Moderator

David Oxenford, Wilkinson, Barker, Knauer

David Layer, NAB

Chris Tarr, Magnum Media, Wisconsin EAS

# 2022 LA Auto Show car survey

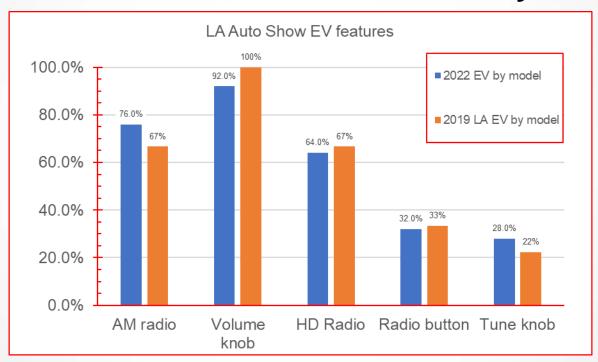

- Notable takeaways:
  - -19 out of 25 EV models have AM radio (76%)
  - -10 out of 13 EV brands have AM radio (77%)
  - -Fewer exhibitors, one industry-only day (down from two)
  - -Hyundai / Kia / Genesis were standout manufacturers
  - -Front passenger display in Jeep Grand Wagoneer
  - Continued absence of HD Radio technology in Chevy ICE vehicles (also true for Chevy EVs)

## 2022 LA Auto Show car survey

### **PILOT** radio test bed

- Located at NAB hq in Washington, DC
  - -Part of the NAB Technology Lab

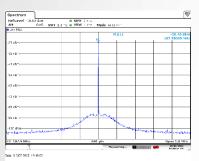

### PILOT radio test bed

- Located at NAB hq in Washington, DC
  - -Part of the NAB Technology Lab
- Recent activities:
  - Installing RF channel simulator
  - Used to make audio recordings in presence of simulated EV wireless charger interference
  - Work with Xperi to develop hybrid IBOC FM signals for aeronautical band interference testing

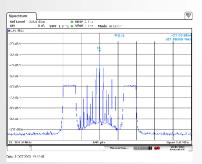

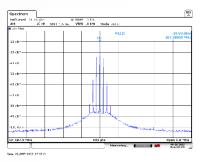

## FM spectra captured on test bed

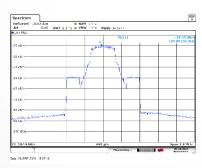

Unmodulated carrier

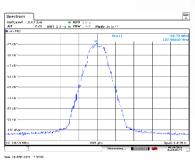

MP1 with stereo and 67 kHz SCAs (no analog audio)

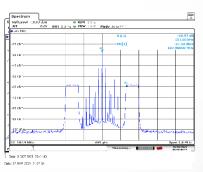

FM stereo showing 19 kHz pilot

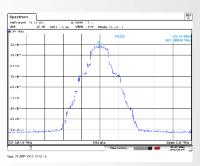

FM stereo with audio and symmetric IBOC sidebands

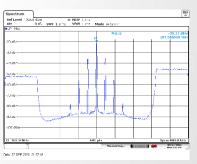

FM stereo with audio

FM stereo with asymmetric IBOC sidebands (USB -13 dBc)

FM stereo with audio plus SCAs

FM stereo with asymmetric IBOC sidebands (USB -13 dBc)

### **FM** digital power increase

 Proposal to allow more FM digital stations to increase to -10 dBc being considered by the FCC

Comments and replies now submitted

 Issue raised by aeronautical industry regarding adjacent frequency band

## **Spectrum and regulatory issues**

- NAB is active in national, regional and international spectrum and regulatory issues
  - -Federal Communications Commission (FCC)
  - -North American Broadcasters Association (NABA)
  - International Telecommunication Union (ITU)

WELLER

- Current issues including:
  - -TV rules cleanup

Drone remote ID

-13 GHz ENG

# **Quiescent Items**

- C-Band Transition/Reimbursement (18-122)
  - All satellite operators report transitions complete
- Recon of DTS Rules (20-74)
- 2 GHz Space Launch Operations (13-115)
- 6 GHz Remand, C2C, VLP (18-295)
  - 155 LPI APs, 1549 LPI clients now authorized
- WMAS (21-115)
- T-Band Sharing (RM-11915)
- National Spectrum Policy (NTIA)
- WRC-23 preparation

# B LEGAL Drone Remote ID (FAA)

- FAA adopted new rules for Drone aircraft
  - Effective September 16, all drone pilots must register their UAS in the FAADroneZone and must operate in accordance with the rule on Remote ID
  - Newer UA are intrinsically compliant and broadcast the required information (serial #, lat/long, altitude, control station location, etc.)
  - Older UA may require a firmware update OR installation of an external Remote ID Broadcast Module.
  - DJI and others report delays in both availability of updates and external modules
  - NAB and New Media Coalition filed for 9-month extension
  - FAA indicated Remote ID deadline will slip, but no official announcement yet.

# **NRSC** update

- AM and FM Analog Broadcasting (AFAB) Subcommittee
- Martin Stabbert (Townsquare Media), chair
- Data Services and Metadata (DSM) Subcommittee
- -Steve Shultis (NYPR), chair
- Digital Radio Broadcasting (DRB) Subcommittee
  - -Jackson Wang (eRadio) and Glynn Walden (CBS, retired), co-chairs

# NRSC update

- Three documents up for adoption at 2023 NAB Show NY meetings:
  - -NRSC-G102, AM Carrier Synchronization Guideline
- -NRSC-G304, Metadata for Streaming Handbook
- NRSC-G202-B, FM IBOC Total Digital Sideband Power for Various
  Configurations
- "Unified transport" standard being discussed in the IBOC Standards Development Working Group (ISDWG)

# **Today's presentation**

- About NAB lite
- Implementing m
- NAB Tech
  - -AM radio
  - -PILOT radio
  - -FM digital powe
  - Spectrum and regulatory
  - -NRSC undate

Thanks for having me today!
