APPENDIX J: FCC MAPBOOK FOR WISCONSIN

The following diagram shows the routing of the EAS Emergency Action Notification (EAN) in Wisconsin. All SR, LP-1, and LP-2 stations are identified on the previous page, along with the counties located in their respective EAS Local Areas (also shown on the map in Appendix E of this Plan). To determine the EAN path for any particular PN EAS Participant, the county of the EAS Participant’s City of License determines the SR and LP-1 stations it monitors. These EAS Monitoring Assignments can be quickly determined from the list on the previous page, or in more detail in Appendix A of this Plan, Table of Monitoring Assignments for Legacy EAS. Combined with the detailed data in the Electronic Test Reporting System (ETRS) as outlined in the FCC EAS rules, the Commission will thus have a complete picture of the EAN dissemination in Wisconsin.

Note: In past years, the FCC EAS Office furnished states with a detailed station-by-station FCC Mapbook. In 2006, that office informed SECCs that they no longer maintain the FCC Mapbook database. For reference, the most recent FCC Mapbook from the FCC in the year 2000 is posted on the Wisconsin EAS webpage: <http://www.sbe24.org/eas/FCC-MAPBOOK-0400.pdf>
